

Team 3: Joshua Bowman, Felipe Cantagalli, Kriti Kochar, Kaiwen Xu, Elliott Mantock

Problem Statement:

There is currently no dedicated Android application for Wikipedia that provides functionality of viewing different articles simultaneously and saving articles for reading later.

Objectives:

- Develop a easy-to-use wiki app for android users
- Provide ability to have multiple articles open simultaneously
- The user interface should be easy to use and allow users to save articles for future reference.

Stakeholders:

- Android users who read Wikipedia frequently
- Software Developers
 - Joshua Bowman, Felipe Cantagalli, Kriti Kochar, Kaiwen Xu, Elliott Mantock
- Project Coordinator
 - Lillian Liu
- Wikimedia Foundation

Deliverables:

- A specialized Android application for Wikipedia which will allow users to view different articles simultaneously.
- Ability to search Wikipedia for desired articles.
- Allowing user to save the article for later reading.
