

Design Inspection Defect Log

Product	WikiDroid Design Inspection		
Date	2/20/2014		
Author	WikiDroid Team		
Moderator	Josh Bowman		
Inspectors	Elliott Mantock, Kriti Kochar, Kaiwen Xu		
Recorder	Felipe Cantagalli		
Defect #	Description	Severity	How Corrected
1	Nothing is been displayed in the main screen before user starts searching	2	It can display "Today's featured article" or/and "In the news" which is features in the wikipedia main page (https://en.m.wikipedia.org/wiki/Main_Page) Or maybe just a image to represent the initial page
2	"Save article" is not very accessible if it's put in the menu	2	"Save article" can be displayed as an icon in navigation drawer
3	No option to close tab	1	Add a icon to navigation drawer to close current tab
4	No way to delete saved articles	3	Click "save article" button again to delete saved articles or in the list of saved articles a lonk click should allow user to delete save file
5	There is no "Share button" to share the article link	3	Implement a share button on the action bar to share the loaded article
6	There is no screen to list all the links saved	2	Implement a button that goes to the saved links
7	There is no screen to list all the article saved	2	Implement a button tthat goes to the saved articles.
8	There is no way to select article from search results	2	Implement a way to show and let user select from search results
9	Wikipedia's built-in search bar and languages selection tool still available to user	2	Since we are implementing native UI for searching and selecting languages, we should remove these built-in UIs by programmatically rewriting HTML got from Wikipedia
