Usability Testing Defect Log

Defect #	Description	Severity	How to Correct
1	The "Settings" option in the menu does nothing.	3	There are no settings to the app that are user-specific; simply remove the option.
2	Wikipedia's mobile website has a menu button of its own, which leads to confusion among users.	2	Hide Wikipedia's versions of our functionalities (searches, menu buttons, language switching, etc.) with a script.
3	User is confused about what the "Star" button does (which is in the drawer).	2	Replace "Star" button with a more intuitive one.
4	User is confused about what does "Folder" icon mean in the "List of Articles Saved"	2	Replace "Folder" icon with a more intuitive one.

Configuration Testing Defect Log

Defect #	Description	Severity	How to Correct
1	On devices which are supposed to used in landscape mode, the app only opens up in portrait mode.	3	Allow orientation change, or detect device default oritentation.
2	On devices with large screen (large or xlarge), the app still opens up the mobile version of Wikipedia website.	3	Detects screen size and picks right version of Wikipedia page.
3	On devices with large screen (large or xlarge), the app does not fully utilize the space of action bar.	3	Move more menu options onto action bar as an icon.
4	Wiki page takes won't display until it's fully loaded on Android 4.4.2 (API 19).	2	No known solution yet.
5	10 max tab size limit is a little too small for high memory devices (especially tablets like Nexus 10).	2	Adjust max tab size limit at runtime.
6	Opening 10 tabs at the same time on low memory devices causes the device to slow down.	2	Adjust max tab size limit at runtime.
7	On Android 4.0 (API 14), when user long clicks on some text, the icon of "select all text" which shows in the contextual action mode is wrong (the icon shows up as WikiDroid logo, and it does not make any sense).	2	Manually assign icons to menu options which is shown in context menu.
